

# Storage Power Plant

Graciosa Island

Serving commercial and industrial customers, utilities and transport with high quality battery storage systems since 1909.

## The Challenges

**Graciosa** is an island of 4,500 inhabitants in the Atlantic Ocean that is part of the Portuguese Azores, 1,600 km away from the Portuguese mainland. In the past, 100% of Graciosa's 13.6 GWh annual load was provided by diesel generators, requiring more than 3.3 million liters of diesel very year.

## The Solution

**Leclanché** installed a **7.4 MW / 3.2 MWh** Lithium Titanate Oxide (LTO) battery energy storage system (BESS) for a microgrid featuring a 4.5 MW wind farm, a 1 MW solar PV plant and a diesel generator plant. The BESS compensates for the highly variable renewable energy production, provides voltage and frequency control, and has grid-forming capability if needed.

Diesel generation is now used almost exclusively for backup power, decreasing overall diesel consumption by more than 65% and resulting in annual fuel savings of €1.9 million. Leclanché's microgrid solution was provided on a turnkey basis and includes a 20-year lifetime performance warranty.

The rapid variations in electricity production from wind and solar PV require the BESS to be able to charge and discharge rapidly and achieve a high cycle count without experiencing too much degradation. LTO cell technology is uniquely capable in this regard, retaining 80% of its nominal capacity after more than 20,000 cycles. Given the 20+ year power purchase agreement and the high cycle count required by this application, LTO is the only technology that both guarantees optimal performance and minimizes maintenance expenses over the lifetime of this key infrastructure asset.

### Leclanché SA (Headquarters)

Avenue des Sports 42  
CH - 1400 Yverdon-les-Bains  
Switzerland

### Leclanché GmbH

Industriestrasse 1  
D - 77731 Willstätt
